DYNAPAC
ECO MODE

SUSTAINABLE COMPACTION

Here at Dynapac, we are committed to working to create solutions that are beneficial for the environment but also for our customers. EcoMode fulfils Dynapac's promise to offer soil and asphalt rollers that have a very low fuel consumption to customers.

EcoMode enables automatic idling after 10 seconds in neutral., which will reduce the engine's RPM. It also includes instant start up after idle mode. EcoMode does not interfere with the workflow or operation of the machine, so compaction quality is not affected.

CA SOIL ROLLERS

CC TANDEM ASPHALT ROLLERS

CX PIVOT ASPHALT ROLLERS

ECOMODE IS AVAILABLE ON	
SOIL ROLLERS	CA1500-CA6500
TANDEM ASPHALT ROLLERS	CC2200 VI - CC6200 VI
PIVOT ASPHALT ROLLERS	CX8 - CX9

A lite version of EcoMode is also available on the following machines: CA1300 - CA1400, CC800 - CC1000, CC1100 VI - CC1400 VI and the CS1400 VI.

FAYAT GROUP

FUEL SAVING FEATURES

Machines that are equipped with EcoMode, minimise fuel consumption and CO_2 emissions. Achieved by ensuring the roller does not consume more power than is necessary, this gives up to 20% less fuel consumption, dependent on the type of roller, as well as a lower noise level.

ENVIRONMENTAL SOLUTIONS

EcoMode, along with other innovative solutions like SEISMIC and EcoSave, are a part of Dynapac's effort to reduce the fuel consumption and thereby the carbon footprint of all machines. These innovations strive to create a better working environment for our customers and their surroundings.

- Save up to 20% on your carbon footprint
- Reduce noise levels for an improved working environment
- Save up to 20% on fuel, depending on application
