DYNAPAC

Designed for the Road Ahead

From interstate highways to large job sites, Dynapac's US highway-class pavers delivers top-tier paving solutions. Built and proven in the USA together with North American customers, these pavers combine the best screeds on the market, high-performance tractor design, smart paving technology, and maximum uptime.

MAT MASTER SCREEDS

Built around what matters most on the jobsite, Dynapac highway-class pavers deliver proven paving quality you can rely on. At the heart of every machine is the Mat Master screed which is long established, field-proven, and widely regarded as one of the best screeds on the market.

BUILT ROCK-SOLID.

A rugged, heavy-duty tractor design ensures long-term durability and reliability, while advanced track and wheel systems set Dynapac apart. From highly rigid box track construction with intelligent track protection to dynamic wheel suspension that keeps the screed stable over uneven surfaces, every detail is engineered for consistent mat quality.

RESULTS MATTERS

Smart design continues with outstanding service access, excellent all-around visibility, and a comfortable operator environment with full control and confidence. High-capacity augers maximize material flow for changing job widths, while extended warranty options and advanced safety systems protect both your investment and your crew.

This is paving performance built for uptime, quality, and long-term success.

Guess what?

Discover the proven Mat Master Screeds. Known as the most stable screeds on the market.

Dynapac_Brochure_HighwayPaver_US.indd 3 06.02.2026 12:59:24

A Powerful Range of Strength

Not fast and furious, but definetly faster than you expected.
Choose the right one for you from three powerful machines.

What we are talking about

MOST STABLE SCREEDS ON THE MARKET

You get award-winning Mat Master screeds that deliver consistently high-quality paving results.

FASTER WORK WITH PAVE MANAGER

Smart, simplified paving is at your fingertips with the Dynapac Pave Manager, helping you work faster and more efficiently.

EXCELLENT TRACTION

The advanced I-Track system ensures excellent traction and outstanding reliability in all conditions. Dynamic Suspension Control enhances traction and pavement quality on wheel pavers for a smoother, more uniform mat.

Power through every job with larger augers than other pavers in its class.

Engineered to move more material, faster. Thanks to rapid material throughput, you get higher productivity, shorter cycle times, and more work done every day.

Choose performance that keeps you ahead.

17 inch
Auger Diameter

D25T

- Rubber tracked paver
- Engine rated power: 173 hp @ 2 200 rpm
- Working width: 8 - 16 ft
- Max. Operating width: 20 ft
- Screeds: Mat Master 16R Mat Master 15F

D30T

- Rubber tracked paver
- Engine rated power: 225 hp @ 2 200 rpm
- Working width: 10 - 20 ft
- Max. Operating width: 30 ft
- Screed: Mat Master 20R

D30W

- Wheeled paver
- Engine rated power: 225 hp @ 2 200 rpm
- Working width: 10 - 20 ft
- Max. Operating width: 30 ft
- Screed: Mat Master 20R

Endless Paving Excellence

Whether rear- or front-mounted, you can rely on Dynapac Mat Master screeds. Proven in the field, award-winning, and trusted by professionals. Dynapac delivers some of the best screeds on the market, backed by a proven track record.

TRUE PAVING WIDTH
– NO EMPTY PROMISES.
Get true 10 - 20 ft paving width with Dynapac Mat Master rear extensions screeds.
Our technology ensures consistent width and top-quality mat every time.

THE HOT THING
Enjoy uniform, multi-zone heating for smooth material flow – just the way it should be – and rely on a robust mechanical design with reinforced guide tubes that naturally minimize bending.

SPOT-ON IN EVERY DIRECTION
Take full control with hydraulic crown, slope, height, and extension adjustments – fast, precise, and easy on the job.
Mat Master gives you width, strength, and reliability you can trust.

Unique heavy duty screed design
– engineered to simplify your work, protect your investment, and deliver consistent results every day.

Mat Master Rear Screeds for D30T & D30W

Unique hydraulic double extensions screeds for wider width from

10 ft - 20 ft
8ft - 16ft

Mat Master Front Screeds for D25T

Unlimited potential for paving in large interstate highways to parking slots on the same day.

Flexibility

Rugged Build

From East to West, from North to South. Dynapac's unbeaten track system, designed for unlimited paving and maximum uptime, stands strong even in the toughest situations. On wheels, you benefit from the unique Dynamic Suspension System.

Dynamic Suspension System for Wheel Paver

The rear-wheel floating suspension absorbs uneven surfaces and obstacles while keeping the screed stable. This reduces lifting, improves mat quality, and delivers a smoother, more consistent finish - exactly what operators expect on challenging jobsites.

D30T and D25T Track Pavers: Built tough for a reason

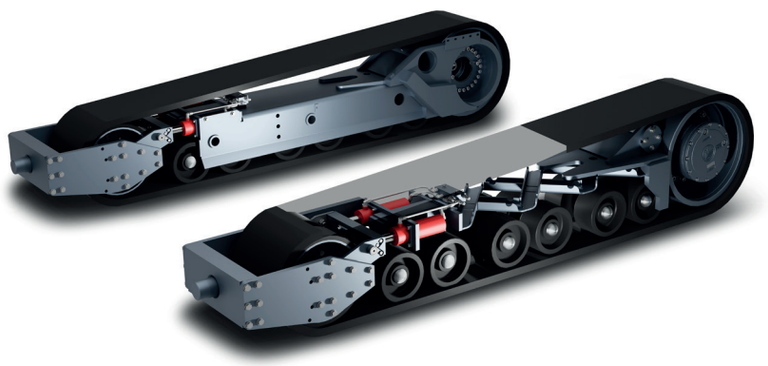

The tractor may look classic, but it's built heavily for a reason. Every component is designed with ruggedness and longevity in mind, ensuring your machine delivers reliable performance day after day. This isn't just tough-looking – it's tough under pressure, engineered to last.
Our track system combines mechanical strength with intelligent protection for unmatched performance.This track system is designed to maximize uptime, extend service life, and deliver consistent performance even under the toughest conditions.

Strong I-Track System

Monitors track tension and stops the machine automatically to prevent failure and track band damage.

2
Two Hydraulic Cylidnders per track

Box Track Construction & Rigidity: Supported from the front and sides, not just bolted on like competitors, for higher rigidity and longer life.

Service Made Simple

Paving results, productivity and uptime above all. That also means a smart service concept.

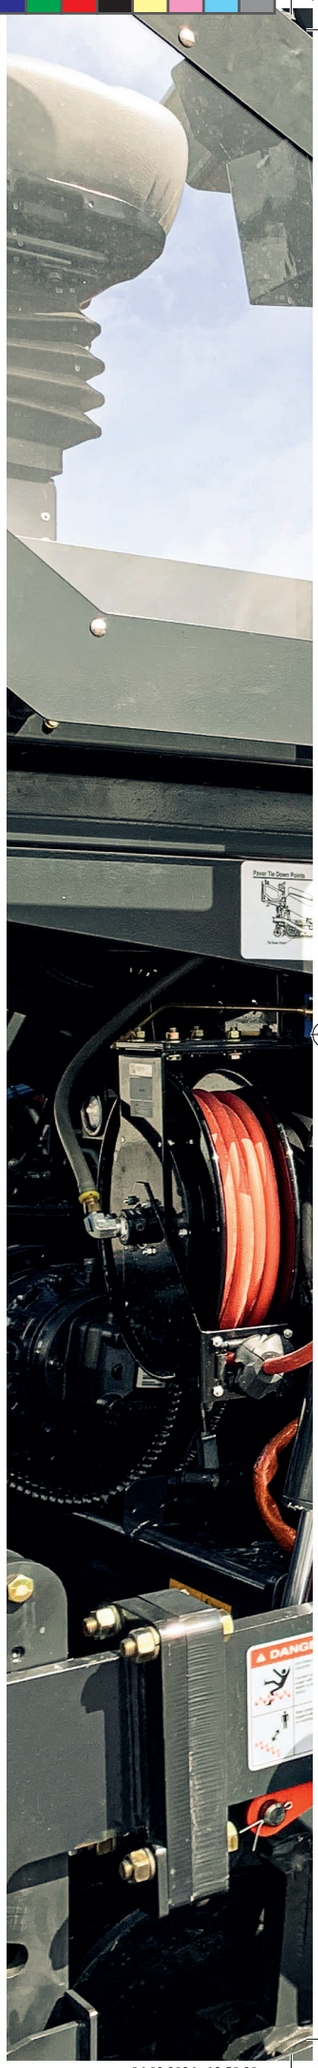

PRODUCTIVITY AND UPTIME FIRST
Productivity and uptime are your top priorities – and that's exactly what this machine delivers. A smart service concept enables faster maintenance, reduced downtime, and more time on the job.

SERVICEABILITY & ACCESS
Designed for maximum serviceability and easy access, routine maintenance and service tasks are quick and straightforward, saving time in daily operation.

LENGTHWISE ENGINE MOUNTING
The lengthwise-mounted engine provides clear, direct access to critical components, simplifying inspections and making service work faster and more efficient.

ONE-TOUCH FULL HOOD OPENING
At the push of a button, the hood opens fully using battery power, giving you quick, effortless access without manual lifting.

SIDE-MOUNTED PUMPS & SWING-OUT FUEL TANK
Side-mounted pumps and a swing-out fuel tank ensure excellent accessibility and visibility, providing clear access to key areas for faster and safer maintenance.

Diesel
ULTRA LOW SULFUR DIESEL FUEL ONLY
THIS ENGINE IS TO BE USED WITH LOW ASH LUBRICATING OIL CJ-4 ONLY

WARNING

Expect One, get Three Years

Why settle for the standard 1-year coverage when you can go further? With Dynamax, key components can be covered for up to 3 full years. Giving you real peace of mind and less downtime. That means critical parts like the auger, conveyor floor plates, and track rubber bands are protected for longer, so you can focus on getting the job done without worry.

Don’t miss out and ask your local sales representative today to see how much more you can get with DynaMax Warranty.

Assitance You can’t Resist

Powered by standardized guidelines for consistent, high-quality support.
